SUMMARY

Software engineer in web development with hands-on experience in Laravel, React, and building user-focused, dynamically scalable data-driven web applications. Led the development of logistic web management system and improved internal processes by creating an efficient web-based warehousing system. Eager to leverage technical expertise in web development and data visualization for impactful contributions in a professional setting.

EDUCATION

Computer Science

Bina Nusantara University • Jakarta Selatan, Indonesia • Sep 2020 - Nov 2024 • 3.66/4.00

EXPERIENCE

Web Developer Intern

PT Intan Utama Logistik

Feb 2023 - Feb 2024, Cempaka Putih, Jakarta Pusat, Indonesia

- Developed and maintained dynamic, user-friendly website-based systems for inventory management using PHP and Laravel framework.
- Managed and optimized the company's database and server, ensuring seamless data flow and system reliability.
- Conducted daily audits of over 800 incoming data entries daily to ensure data integrity and accuracy, identifying and resolving discrepancies promptly.
- Collaborated with the IT team to troubleshoot technical issues, enhancing overall operational efficiency.

Computer Science Student Activist

HIMTI Bina Nusantara University

January 2021 - March 2023, Jakarta Selatan, Indonesia

- Created and delivered engaging educational videos, simplifying complex subjects for students at the end of each semester.
- Compiled and distributed comprehensive subject summaries, aiding over 200 students in exam preparation and overall understanding.
- Actively contributed to student community events, fostering a collaborative learning environment within the School of Computer Science.
